

Mathematics and Statistics Course Chart (BS with Concentration in Actuarial Science)

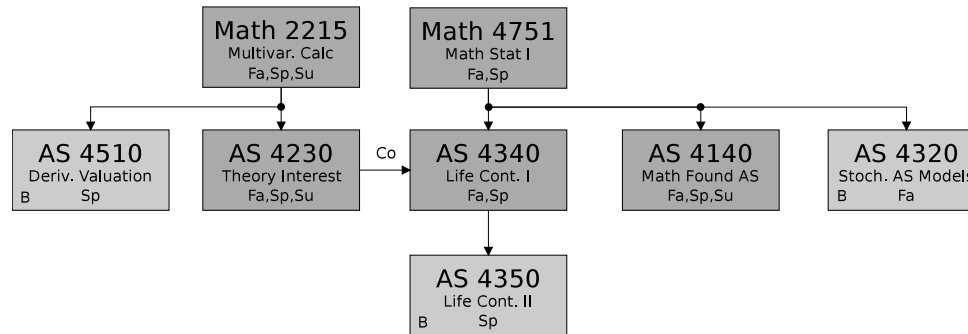

1. Prerequisites always require a grade of C or higher.
2. Corequisites are marked with “Co.”
3. Courses that have Math 1113 as a prerequisite can also use Math 2211 as a prerequisite.
4. Math 4610 and 4620 also require the ability to program in a high level language. Math 3030 can satisfy the prerequisite of Math 4620.
5. For Math 4547, Math 2220 can replace Math 2211 as the prerequisite.
6. For Math 4548, Math 4752 can replace Math 4547 as the prerequisite.
7. For Math 3420, Math 2212 can serve as the prerequisite instead of Math 2420.
8. For Math 4010, Math 1220 can serve as the prerequisite instead of Math 2212.
9. For Math 4211, Math 3030 can serve as the prerequisite instead of Math 2215 and Math 2641.
10. Math 4544 also requires Biol 1104K, 1108K, or 2108K with a grade of C or higher.
11. Math 2215, Math 2641, and Math 3000 are all prerequisites of Math 4435, 4441, and 4661. These are not all shown on the chart when they are enforced implicitly by another prerequisite or corequisite.

Notes on Degree Requirements:

- Shaded courses are required for the Math BS with concentration in Actuarial Science.
- Majors should choose one of the two courses in group A.
- Econ 2105, Econ 2106, CSc 1301, and CSc 1302 are required.
- Courses that cannot count toward a math major are excluded from the chart. Note that the upper level courses Math 3030, 3050, 3070, and 3090 are specifically excluded from the major and minor. At most one of Math 4544 or 4547 can count toward a math major or minor.
- The courses in the calculus sequence, Math 2420, Math 2641, and Math 3000 should be as taken soon as prerequisites are satisfied in order to avoid a delay in starting upper level courses that might result in a delay in graduation. Pay attention to course sequencing and scheduling when planning for graduation.

Required Actuarial Science Courses, with Prerequisites

Notes on Degree Requirements:

- Actuarial science courses that are required for the Math BS with concentration in Actuarial Science are shaded.
- Choose any two of the group B courses AS 4320, AS 4350, and AS 4510.
- It is critically important to pay attention to the sequencing and the terms in which the courses are offered when planning for graduation. Fewer courses are available in summer.
- Math majors in the AS concentration should plan on a full academic year for completing these courses. Note that AS 4340/4350 is a Fall/Spring sequence and that the courses in group B are typically offered only once per year.
- Note that these courses have prerequisites that ideally allow them to be started in the junior year, which can be helpful for staying on track for graduation.
